SUMMARY

Senior full stack developer with 4+ years in production. I own product features from the interface through the API and the database — React and Vue on the client, NestJS or .NET Core and PostgreSQL on the server. I started in communication design, so I still care how a product feels, and I care equally that a team gets a shippable slice rather than a handoff.

EXPERIENCE

Senior Full Stack Developer 2022 – Present

Intime Info Software Solves · Istanbul, Turkey

- Delivered production web products across the stack: Vue/React clients, REST APIs, and PostgreSQL-backed services.
- Owned feature slices from design intent to release — UI, API contracts, and data — so the team received shippable work, not a frontend-only handoff.
- Built and extended NestJS and .NET Core services, including authentication, resource APIs, and integration with product databases.
- Held the quality bar on readable architecture, responsive interfaces, accessibility, and performance in production.
- Worked with product and design (Figma) to turn intent into maintainable code other engineers can extend.

SKILLS

Frontend	React, Vue, TypeScript, JavaScript, HTML, CSS
Backend	NestJS, .NET Core, Node.js, REST APIs
Data	PostgreSQL, SQL
Tools	Git, Postman, Figma

SELECTED WORK

- Social feed product UI · React, Redux, Context API — authenticated feed, session state, reusable layout.
- Turkey weather interface · React, Redux — city search, API-driven data UI, explicit loading and error states.
- Keyboard practice tool · HTML, CSS, JavaScript — keyboard-first interaction with immediate visual feedback.

EDUCATION

Yıldız Technical University · Communication Design 2018 – 2022

LANGUAGES

Turkish — Native · English — B2, professional working
