SUMMARY

Senior Frontend Developer and Team Lead specializing in enterprise-scale SaaS platforms, scalable UI architecture, and cross-platform applications. Holding a B.A. in Communication Design from Yıldız Technical University, I bridge strong UI/UX sensibilities with rigorous frontend engineering. Since 2022, I have been building production software at Intime Info, currently leading the frontend engineering and Vue 3 + TypeScript architecture for **Intime IK**—an enterprise HR ecosystem encompassing Time & Attendance (PDKS), payroll, CRM, project management, and performance modules. Deeply experienced in scalable SPA architectures (Vue 3, React), type-safe development (TypeScript), and optimizing high-density data interfaces. Additionally, I architect and ship end-to-end (Full-Stack) mobile and web products using React Native (Expo), NestJS, and PostgreSQL.

EXPERIENCE

Frontend Team Lead | Intime Info Software Solutions Inc.

Ataşehir, Istanbul, Turkey (Hybrid) | Jun 2024 – Present

- **Technical Leadership & Product Delivery:** Lead the Vue 3 and TypeScript frontend architecture and engineering team for the Intime IK enterprise platform across Time & Attendance (PDKS), payroll, CRM, helpdesk, contracts, and performance modules.
- **Shared UI Architecture (Core Architecture):** Own and maintain the shared frontend architecture, including high-performance data tables, dynamic theming, centralized authentication/authorization (Auth/RBAC), and the custom REST API client layer.
- **Code Quality & Standards:** Drive code review processes and enforce strict production standards across TypeScript type safety, Element Plus component standards, and responsive design criteria.
- **Cross-Functional Delivery:** Collaborate closely with Product (Figma) and Backend teams to translate complex business requirements into modular, scalable, and sustainable production releases.

Frontend Developer | Intime Info Software Solutions Inc.

Üsküdar, Istanbul, Turkey | Jul 2022 – Jun 2024

- **Production-Grade Interfaces:** Translated Figma designs for the Intime IK platform into pixel-perfect, reusable Vue 3 components, delivering advanced data lists, dynamic forms, interactive calendars, and management dashboards.
- **API & State Management:** Architected RESTful API integrations, centralized client-side state management (Pinia), and role-based access control (RBAC) views for mission-critical screens used daily by HR operations teams.
- **Performance Optimization:** Eliminated rendering bottlenecks across high-density enterprise data

tables, significantly optimizing page load speeds, memory usage, and layout stability.

SKILLS

- **Frontend & Mobile:** Vue 3 (Composition API), Nuxt, React, React Native (Expo), TypeScript, JavaScript (ES6+), Pinia, Tailwind CSS, Element Plus, HTML5, CSS3
- **Backend & Architecture:** NestJS, ASP.NET Core, Node.js, RESTful API, SPA Architecture, RBAC / Auth
- **Data:** PostgreSQL, MS SQL Server, SQL
- **Tools & Workflow:** Git, Vite, Postman, Figma, Code Review, Agile / Scrum

PROJECTS

- **Intime IK** *(Vue 3, TypeScript, Pinia, Element Plus)*: End-to-end enterprise HR management platform where I lead frontend development (Time & Attendance / PDKS, payroll, CRM, helpdesk, contracts, and performance modules).
- **Intime Proje** *(Vue 3, TypeScript, Pinia, Element Plus)*: Enterprise project management platform featuring Kanban boards, issue tracking, timelines, advanced reporting, role-based access control, and Git commit integration.
- **Filonika** *(Vue 3, ASP.NET Core 8, SQL Server)*: End-to-end corporate fleet management system managing vehicles, drivers, leasing contracts, insurance, and financing workflows.
- **Cumbara** *(Vue 3, TypeScript, Pinia, Element Plus)*: Comprehensive loyalty administration panel featuring campaign orchestration, dealer networks, reward/point mechanisms, and push notification management.
- **Fair Analytics** *(Nuxt, Vue 3, TypeScript, Tailwind CSS)*: Multilingual (TR/EN) and SEO-focused (SSR) corporate product showcase, blog, careers, and contact platform.
- **VYC Türkiye** *(Vue 3, TypeScript, Tailwind CSS)*: Complete bilingual (TR/EN) ground-up rewrite of the corporate web platform using modern frontend architecture (vycturkiye.com).
- **HydraPlant** *(React Native / Expo, NestJS, PostgreSQL)*: Gamified mobile hydration tracking application featuring authentication, daily goals, streak tracking, and home screen widget support.
- **Beyaz Nokta** *(React Native / Expo, NestJS, PostgreSQL)*: Online mobile football management game featuring real-time rooms, leagues, daily match simulations, and transfer mechanics.

EDUCATION

- **Yıldız Technical University** – B.A. in Communication Design | *2018 – 2022*

LANGUAGES

- **Turkish:** Native
- **English:** B2 (Professional Working Proficiency)
